

GME Competency  
Education Program

## NEW QI and Patient Safety curriculum certificate

For the first time, GCEP now includes an expanded Quality Improvement and Patient Safety education series of 10 micro-lessons. Learners who complete the full curriculum will earn the new certificate of completion: *Foundations of Quality Improvement and Patient Safety*.

### Assign curriculum

Created specifically for residents by subject matter experts, with health equity woven throughout each course.

Four of the micro-lessons include a longitudinal case study that covers how to respond to and report an adverse event, conduct an RCA and apply PDSA Cycles to a QI project.

Micro-lessons have an average run time of 17 minutes.
