From Martha Jordan, GME Administrative Director*

2022-23 Resident/Fellow and Faculty Surveys: Reporting Window

The reporting period for the ACGME's annual surveys will run from Monday, February 13, 2023 through Sunday, April 9, 2023. The resident/fellow and faculty surveys will be available at the same time.

We anticipate that programs will receive their reports in early May. Please stress to your residents and faculty the importance of completing the ACGME survey. The GME office will be monitoring completion to ensure that all of our programs achieve at least 70% compliance for residents and faculty (our goal is to have 100% compliance for both surveys in all programs). Please make sure that your core faculty lists are accurate in ACGME ADS since they will be the ones required to complete the survey.
